Stichting NIOC en de NIOC kennisbank

Stichting NIOC (www.nioc.nl) stelt zich conform zijn statuten tot doel: het realiseren van congressen over informatica onderwijs en voorts al hetgeen met een en ander rechtstreeks of zijdelings verband houdt of daartoe bevorderlijk kan zijn, alles in de ruimste zin des woords.

De stichting NIOC neemt de archivering van de resultaten van de congressen voor zijn rekening. De website www.nioc.nl ontsluit onder "Eerdere congressen" de gearchiveerde websites van eerdere congressen. De vele afzonderlijke congresbijdragen zijn opgenomen in een kennisbank die via dezelfde website onder "NIOC kennisbank" ontsloten wordt.

Op dit moment bevat de NIOC kennisbank alle bijdragen, incl. die van het laatste congres (NIOC2023, gehouden op donderdag 30 maart 2023 jl. en georganiseerd door NHL Stenden Hogeschool). Bij elkaar bijna 1500 bijdragen!

We roepen je op, na het lezen van het document dat door jou is gedownload, de auteur(s) feedback te geven. Dit kan door je te registreren als gebruiker van de NIOC kennisbank. Na registratie krijg je bericht hoe in te loggen op de NIOC kennisbank.

Het eerstvolgende NIOC vindt plaats op donderdag 27 maart 2025 in Zwolle en wordt dan georganiseerd door Hogeschool Windesheim. Kijk op www.nioc2025.nl voor meer informatie.

Wil je op de hoogte blijven van de ontwikkeling rond Stichting NIOC en de NIOC kennisbank, schrijf je dan in op de nieuwsbrief via

www.nioc.nl/nioc-kennisbank/aanmelden nieuwsbrief

Reacties over de NIOC kennisbank en de inhoud daarvan kun je richten aan de beheerder:

R. Smedinga kennisbank@nioc.nl.

Vermeld bij reacties jouw naam en telefoonnummer voor nader contact.

Een taartje met een staartje

Door ouders van kinderen van een basisschool in Heerlen werd de GGD Oostelijk Zuid-Limburg op woensdag 23 juni 1999 op de hoogte gebracht van het feit dat in groep 3 een groot aantal kinderen binnen korte tijd ziek was geworden. Er waren klachten van diarree en braken. Het bleek dat op donderdag 17 juni 1999 in groep 3 van de basisschool zelfgemaakte verjaardagstaart gegeten was. De verjaardag van twee leerkrachten was de aanleiding om op deze verjaardagstaart te trakteren. Deze taart werd na eerder succes volgens het recept in de leesmethode van de school bereid. In deze taart werd bij de bereiding gebruik gemaakt van rauwe eieren. Eén dag later op vrijdag 18 juni bleken enige kinderen ziek te zijn met klachten van diarree en braken. Op de maandag erna, 21 juni, bleek een groot aantal kinderen ziek thuis te zijn. De suggestie bestond dat in de taart verwerkte eieren mogelijk besmet waren met een bacterie en er kon dus sprake zijn van een voedselinfectie. De GGD heeft op grond hiervan een onderzoek ingesteld naar de klachten en de mogelijke oorzaak. Doelstelling van het onderzoek was om de voedselinfectie in kaart te brengen en op basis van de verzamelde informatie zo mogelijk maatregelen te treffen om nieuwe incidenten in de toekomst te voorkomen

EENVANDAAG

In de aanloop naar de gemeenteraadsverkiezingen op 3 maart 2010 roept de Syrische radicaal conservatieve imam Fawaz Jneid alle moslims in Den Haag op niet op de PVV van Geert Wilders te stemmen. Den Haag is een van de twee steden waar de PVV deelneemt aan de verkiezingen. VERKLARING van Fawaz tijdens het vrijdaggebed, waarin hij zegt dat de rechtextremisten worden geleid door Wilders; hij houdt de aanwezigen voor dat het een plicht is te gaan stemmen om de moslimgemeenschap te dienen. INTERVIEW met Fawaz, waarin hij Geerd Wilders vergelijkt met de Duitse nazi-leider Adolf Hitler door het Europese ras te verheerlijken. SHOTS: - vrijdagsgebed in As-Soennahmoskee; - nieuwbouw voor uitbreiding As-Soennahmoskee. In de regio West-Friesland neemt het alcoholmisbruik onder jongeren toe. De overlast die zij veroorzaken wordt in Hoorn aangepakt door café's om 24.00 uur te sluiten. Nieuwe cafébezoekers komen de kroeg dan niet meer in. Daarmee worden kroegentochten en de kans op coma-zuipen gereduceerd. INTERVIEWS met: - PvdA-raadslid Judith de Jong, die zegt dat de maatregel de doelgroep treft, de café-bezoekers tot 23 jaar; - Roger Tonnaer, oprichter fractie Tonnaer, die voorziet dat door de maatregel jongeren thuis nog

ANATOMY OF THE LONG TAIL

Online services carry far more inventory than traditional retailers. Rhapsody, for example, offers 19 times as many songs as Wal-Mart's stock of 39,000 tunes. The appetite for Rhapsody's more obscure tunes (charted below in yellow) makes up the so-called Long Tail. Meanwhile, even as consumers flock to mainstream books, music, and films (right), there is real demand for niche fare found only online.

ABSTRACT

This paper presents a federated search and social recommendation widget. It describes the widget's interface and the underlying social recommendation engine. A preliminary evaluation of the widget's usability and usefulness involving 15 subjects is also discussed. The evaluation helped identify usability problems that will be addressed prior to the widget's usage in a real learning context.

are very useful, but their generality can sometimes be an obstacle and this can make it difficult to know where to search for the needed information [2]. Federated searching over collections of topic-specific repositories can assist with this and save time. When the user sends a search request, the federated search widget collects relevant resources from different social media sites [3], repositories and search engines. Before rendering aggregated results, the widget calls a personalized social recommendation service deemed as crucial

Ruben Faelens Studying engineering is not only about studying. The university is a cooking pot of the brightest minds of society; and there will never be so many smart people together in such a free climate. If you ever wanted to go on a trip around the world, build a catapult, create the next Google, or build your own robot: you will find people to do it with at the university!
Just don't forget to study. :-)

About

Start implementation Flex

October 2, 2009 professorduvaliseengenie 2 comments

Hi,

Today we started with the implementation of our revolutionary mash-up application in Flex .

After reading a few guides and watching some introductory movies, we began developing.
We started with part of the application that is supposed to display pictures of any artist, we decided
n Flickr to search them.
r next move is yet to be decided.

main difficulty was to get Flex running on Ubuntu. This now works fine with the exception of
esign Mode for a WYSIWYG approach.
fortunate Bart had a Macintosh machine at his disposal, and that most of us have sufficient
e of virtual machine to get a somewhat decent developing environment set up.

are much disappointed of the lack of linux support of this technology, Flex itself seems to
intuitive tool. The only down side is that the code itself has a tendency to become
eal fast.

Mashup storyboard

28/09/2009

For the first session of this year's Multimedia course at the K.U. Leuven, we were given the task to design the "storyboard" for a new mashup in Flex. The "theme" of the mashup must be music.

After a lot of brainstorming, we've come up with an idea for an application which allows its users to search for artists and track names bound to (as in "originating from" or "released in" ...) a certain location and/or time. The app should query the Last.fm database (and maybe others too?) to collect data on the artists and track names, given a location and/or time (period). We're still working on ideas for incorporating visualization, but here's our first draft of the storyboard:

Hi Erik,

Victor here, one of the founders of Mendeley. We certainly appreciate your students' comments, I think it's very good feedback! You've managed to highlight three of the main issues we are working on right now (of course, as we are still in beta, many UI elements are still in flux).

Regarding the relationship between the desktop app and the website:

Indeed this should be communicated more clearly. The desktop app is like an "iTunes for research papers", i.e. you can manage, read, and annotate your PDFs locally. The website, on the other hand, is more like a "Last.fm for research": It "scrobbles" your library to the cloud, so you can sync it across multiple devices and access it in a browser. It also generates a catalogue of research (more on that later), Last.fm-like stats about the most popular papers, and it gives recommendations for related research (these are currently only available on article pages, e.g. http://www.mendeley.com/research/evaluation-of-murine-norovirus-as-a-surrogate-for-human-norovirus-and-hepatitis-a-virus-in-heat-inactivation-studies/). We're currently working on an improved "newsfeed" system which will display more of your desktop-app-based research activity on the website and let you and others comment on research papers you've added to your library; likewise, we'll be pulling these newsfeeds, statistics and related research recommendations into the desktop interface right next to your research paper library. This should make the flow of information between desktop and web more visible.

Regarding the registration process:

This was just changed on Friday – there is now a registration form on pretty much any page on the website. However, there has always been a login box at the top right on every page – sorry if that isn't obvious enough.

Regarding the search:

You're right – there isn't any way to search the catalogue of research papers on the website. This is not for a lack of wanting, but because we first had to build a scalable back-end to deduplicate millions of documents on the fly (every day, more than 100,000 papers get uploaded to Mendeley) which could then be indexed. We'll soon be releasing a new interface for searching and browsing research papers, public collections of papers, and researchers.

Hope this was useful,
thanks again,

Victor
