

Stichting NIOC en de NIOC kennisbank

Stichting NIOC (www.nioc.nl) stelt zich conform zijn statuten tot doel: het realiseren van congressen over informatica onderwijs en voorts al hetgeen met een en ander rechtstreeks of zijdelings verband houdt of daartoe bevorderlijk kan zijn, alles in de ruimste zin des woords.

De stichting NIOC neemt de archivering van de resultaten van de congressen voor zijn rekening. De website www.nioc.nl ontsluit onder "Eerdere congressen" de gearchiveerde websites van eerdere congressen. De vele afzonderlijke congresbijdragen zijn opgenomen in een kennisbank die via dezelfde website onder "NIOC kennisbank" ontsloten wordt.

Op dit moment bevat de NIOC kennisbank alle bijdragen, incl. die van het laatste congres (NIOC2025, gehouden op donderdag 27 maart 2025 jl. en georganiseerd door Hogeschool Windesheim). Bij elkaar zo'n 1500 bijdragen!

We roepen je op, na het lezen van het document dat door jou is gedownload, de auteur(s) feedback te geven. Dit kan door je te registreren als gebruiker van de NIOC kennisbank. Na registratie krijg je bericht hoe in te loggen op de NIOC kennisbank.

Het eerstvolgende NIOC vindt plaats in 2027 en wordt dan georganiseerd door HAN University of Applied Sciences. Zodra daarover meer informatie beschikbaar is, is deze hier te vinden.

Wil je op de hoogte blijven van de ontwikkeling rond Stichting NIOC en de NIOC kennisbank, schrijf je dan in op de nieuwsbrief via

www.nioc.nl/nioc-kennisbank/aanmelden-nieuwsbrief

Reacties over de NIOC kennisbank en de inhoud daarvan kun je richten aan de beheerder:

R. Smedinga kennisbank@nioc.nl.

Panther - What the community wants

Panther is a programming language aimed at young users with only a small knowledge of programming. Panther offers you a more advanced version of Scratch, a simple programming language developed at MIT.

With a host of new features such as file and webpage manipulation and advanced colour sensing, cloning and much more besides, Panther provides advanced usage for avid Scratchers around the globe as well as new programmers looking for a fluid, easy to understand starting language. *Why not visit our [Wiki page](#) for a full list of our features?*

Welcome to ProgrammingFreak - our newest developer for Panther 1.1!

SUPER SCRATCH PROGRAMMING ADVENTURE!
©2012, THE LEAD PROJECT

Now we'll add more programs to the Virus to keep score. These programs use blocks from the **Control** and **Variables** palettes to record and signal the conditions for winning and losing.

Program 4 creates a new variable called **score** and the conditions we need to meet for the script to broadcast **win**. Your score will now appear on the Stage.

Program 5 creates a variable called **chance**, which keeps track of how many times the Virus is allowed to touch the Server sprite before the player loses. We'll give Scratchy five chances to start. When you're out of chances, the program broadcasts **lose**. Just like the player's **score**, the number of tries the player has left is displayed on the Stage as **chance**.

Tip: When setting the rules for winning and losing in your games, use the greater-than symbol (>) or the less-than symbol (<) instead of the equal sign (=), as we do in programs 4 and 5. This will prevent the game from breaking when a variable changes too quickly!

Why might the variable change too fast in this game? Scratchy might touch the Virus a few times in quick succession, and the program won't realize that you've won the game.

SERVER

When you do run into difficulties, it's not time to give up or cry.

It's time to think about the strategies that you have to solve your problem or to look for help.

No reason to break down or give up – you keep at it.

Taylor, Elementary School Teacher

----- Original Message -----

Subject: Checking for remixing

Date: Sat, 3 Dec 2011 17:35:19

From: -----

To: scratched@scratch.mit.edu

Hi, Is there a way for educators to simply check student work to determine how much is original, and how much was simply copied from the Scratch site? I don't want to upload individual projects from my students. I just want a way to see if the work is original or not. Thanks.

How are you using the Scratch website?

Coming from an English background, it was really important to me that there was a “publication” step. As a writer, the last step is always sharing, getting feedback, and critiquing.

My middle-schoolers are mostly inspired by the feedback they get from their peers and the gratification they get from sharing their projects in such a public way.

Jess, Middle School Teacher

piranah

starfish

Instructions

Clicky clicky for BUBBLES!! (And a piranah attack, but, lets just think about the bubbles ok?)

Touch puffer w/ mouse for BOOM!

Touch eel w/ mouse for ZAP!

Click eel for MEGA ZAP!!!

Movable urchins!(Suggested by cheddagirl*)

Turbo mode for "Hyperactive fish". :3

Random starfish! (Suggested by ThePancakeMan)

Notes and Credits

This got featured!!!! YES!!!! SECOND ONE THIS YEAR!! (also I have 39 messages right now. *gasps*(now 40!)) Love it to suggest a fish.

“

Scratch lets you explore your imagination.
You design your own stuff, and once you start,
you just don't want to stop.
Because as you learn more, you can see there are
more possibilities, and the more possibilities there
are, the more you want to expand on what
you just learned.

”
