Stichting NIOC en de NIOC kennisbank

Stichting NIOC (www.nioc.nl) stelt zich conform zijn statuten tot doel: het realiseren van congressen over informatica onderwijs en voorts al hetgeen met een en ander rechtstreeks of zijdelings verband houdt of daartoe bevorderlijk kan zijn, alles in de ruimste zin des woords.

De stichting NIOC neemt de archivering van de resultaten van de congressen voor zijn rekening. De website www.nioc.nl ontsluit onder "Eerdere congressen" de gearchiveerde websites van eerdere congressen. De vele afzonderlijke congresbijdragen zijn opgenomen in een kennisbank die via dezelfde website onder "NIOC kennisbank" ontsloten wordt.

Op dit moment bevat de NIOC kennisbank alle bijdragen, incl. die van het laatste congres (NIOC2023, gehouden op donderdag 30 maart 2023 jl. en georganiseerd door NHL Stenden Hogeschool). Bij elkaar bijna 1500 bijdragen!

We roepen je op, na het lezen van het document dat door jou is gedownload, de auteur(s) feedback te geven. Dit kan door je te registreren als gebruiker van de NIOC kennisbank. Na registratie krijg je bericht hoe in te loggen op de NIOC kennisbank.

Het eerstvolgende NIOC vindt plaats op donderdag 27 maart 2025 in Zwolle en wordt dan georganiseerd door Hogeschool Windesheim. Kijk op www.nioc2025.nl voor meer informatie.

Wil je op de hoogte blijven van de ontwikkeling rond Stichting NIOC en de NIOC kennisbank, schrijf je dan in op de nieuwsbrief via
www.nioc.nl/nioc-kennisbank/aanmelden nieuwsbrief

Reacties over de NIOC kennisbank en de inhoud daarvan kun je richten aan de beheerder:
R. Smedinga kennisbank@nioc.nl.
Vermeld bij reacties jouw naam en telefoonnummer voor nader contact.

Introduction
Requirements for Computer Science
University entrance requirements for CS
Online courses
Course selection
Conclusion

- Addressing the problem of underprepared students in CS1
- Look at secondary school and undergraduate skills/outcomes requirements
- Overview of online courses
- Propose online courses to help students to become more prepared for CS1

Secondary school
Undergraduate
Relationship between skill-sets

Typical content of a secondary school CS curriculum:

- using basic software

- searching for information on the internet

- programming

- learning to solve complex problems

Peter Hubwieser, 2012
Computer Science Education in Secondary Schools - The Introduction of a New Compulsory Subject

Secondary school
Undergraduate
Relationship between skill-sets

Two secondary school curriculum specifications:

- Computing At School School (CAS) curriculum from the UK

- K-12 Computer Science Standards (CSTA K-12) which is developed by CSTA and ACM in the USA

Undergraduate
Relationship between skill-sets

CAS

CAS sees CS as a STEM discipline, characterised by:

- S - following a scientific approach
- T - understanding, appreciating and applying many technologies to a problem
- E - following a process for the construction of artifacts in the discipline, specifically the design-construct-test cycle
- M - a mathematical foundation

Conclusion

Secondary school
Undergraduate
Relationship between skill-sets

CAS cont.

The learner needs to be able to *recognise* computational aspects in the world, *apply* tools and techniques to the recognised systems, and then *understand* and *reason* about these system. In order to do this, the learner must be able to *abstract*, both by *decomposition* and *generalization*, and *model* the systems. This forms part of the design of the system, which then needs to be constructed by programming it before it is tested. Understanding the construction of the system will require fundamental programming, algorithm and data manipulation skills. CAS also requires that learners have a basic understanding of computer architecture as well as the internet.

Admission requirements
Prior learning

University admission control mechanisms include:

- using the results of the secondary school to gauge ability and specify relevant admission criteria

- requiring students to write a standard admissions/placement/credit test

- conducting interviews

Introduction

Admission requirements
Prior learning

There is evidence that prior learning has a marked effect on pass rates in first year CS. A study by Morrison and Newman [2001] showed that:

- 66% of first year students with prior learning pass CS 1 with at least a C-grade

- only 50% without prior learning pass CS1 with a C-grade.

Pedagogical setting for a good online course:

- takes different learning styles into account (Visual, Auditory, Kinesthetic)
- encourages contact between instructor and students as well as between students
- facilitates active learning
- gives feedback and encourage according to expectations
- schedules activities
- fosters a strong sense of belonging online as online learning can be very lonely

Course equivalences
Proposed curriculum

	Equivalent courses	Skills	Comments
M1	C2(5) and C10(4)	S1 - Algorithms	Foundation in programming required. C2 requires Java.
M2	C3(5), C11(4) and U2(5)	S1 - Algorithms	Advanced Algorithms and data structures. C3 follows on from C2 in Java. C11 follows on from C10.
M3	C4(7), E1(4) and E2(3)	S2 - Analysis and Design	E2 includes basic programming, while C4 and E1 do not
M4	C6(4), C8(5), C9(3), E1(4) and U1(5)	S1 - Programming	Beginner programming, C8 and E1 are more Mathematical
M5	C7(5) and U5(5)	S2 - Testing	Both require a programming foundation

Course equivalences
Proposed curriculum

Introduction
Requirements for Computer Science
University entrance requirements for CS
Online courses
Course selection
Conclusion

- Online introductory courses focus mainly on programming and algorithms
- Limited coverage of secondary school skills still have a positive contribution to undergraduate skills
- Self-study vs teacher guided study, influenced by learner maturity
- Following a curriculum of online courses will have a positive influence on first year undergraduate throughput
- With no guarantee of course delivery, the proposed online course curriculum needs to be reviewed annually
- Universities need to develop their own admissions tests if they wish to use them and do their own analysis of the results
- Maturity in online courses required, particularly with regards to the pedagogical setting
